Enoch Egere

IT Support • CompTIA Security+ • Cybersecurity Professional

London, United Kingdom, enochegere21@gmail.com

enochegere.co.uk | LinkedIn | HackTheBox | TryHackMe

Summary

I'm Enoch, a junior cybersecurity and IT professional based in London. I've spent around three years across IT support and security, from 1st and 2nd line support in regulated healthcare environments to my current part-time work as an IT Security Consultant, where I help clients find and fix vulnerabilities and secure their endpoints. I hold CompTIA Security+ and completed my BTEC Level 3 Extended Diploma in Computing with Distinction. Outside of work I build and break my own home labs, including Active Directory and web server environments, and work through CTFs on TryHackMe and HackTheBox. I'm building a broad foundation across the whole security lifecycle, from building and defending systems to testing them, with a long-term focus on offensive security.

Certifications

- CompTIA Sec+ (Active) – November 2025
- CompTIA AI Essentials – January 2026
- Red Team Leaders CCEP — December 2025
- Cisco Computer Hardware Basics - December 2024
- CREST CPSA — Exam Preparation Ongoing

Courses

TCM Practical Ethical Hacking | Web App Pentest | Wireless Pentest

Soft Skills

Communication || Problem-solving || Advisory || Team Player || Attention to Detail

Technical Skills

Helpdesk & Support: 1st/2nd Line Support, MS365, Active Directory, Ticketing Systems, Remote Desktop, VPN, Server, Administration Awareness.

Tools: Nmap, Wireshark, Metasploit, Burp Suite, Owasp ZAP, Nessus, Kali Linux, Windows/Ubuntu, Bloodhound, Hashcat
Networking: TCP/IP, OSI Model, DNS, Protocols, Wireless Security

Work Experience

IT Security Consultant (part- Time) || CloudFlex
07/2026 – Present, London

- Conducted onsite visits to client premises to assess and remediate vulnerabilities identified through Qualys vulnerability scanning.
- Contributed to Cyber Essentials Assessment for client organisations.

- Deployed endpoint security and monitoring software across 10 workstations as part of a managed security engagement.
- Removed legacy and unsupported software, including deprecated .NET frameworks, to reduce client attack surface.
- Reviewed vulnerability assessment reports and Excel based risk trackers, prioritising remediation actions by severity
- Reviewed local administrator accounts via command line and removed unnecessary privileges, enforcing least privilege.
- Collaborated with senior consultant to deliver patch compliance and security hardening across client endpoints

IT Support (with Security Responsibilities) || Eleven Sisters Healthcare Agency
03/2025 – 03/2026, London

- Administered user accounts, signed in devices and access permissions across the organisation using Google Workspace
- Managed monthly Patch Tuesday cycles across all systems, maintaining full patch compliance with zero critical vulnerabilities left unmitigated
- Supported new staff onboarding end to end, including account creation, device setup and application deployment across Windows, iOS and Android devices
- Maintained IT systems in a healthcare environment, ensuring high availability, data protection compliance and adherence to healthcare IT standards

IT Support || Hak Services
07/2023 – 02/2025, London

- Provided end-to-end troubleshooting for hardware, software, and network issues across the organisation
- Liaised with third-party vendors and monitored remote access connections to maintain system security
- Delivered system handling advisory and user support, reducing recurring support tickets through user education
- Managed remote access sessions, ensuring secure configurations and access controls were maintained.

Education

BTEC Level 3 Extended Diploma in Computing | West Thames College | Distinction

Sep 2024 – Jun 2026 | Modules: Networking, Cybersecurity, Systems Architecture, Database Management

BTEC Level 3 in Animation and Game Design | West Thames College **|** Merit
Sep 2023 – Jun 2024

NECO Senior School Certificate (SSCE) | Unique International School

English Language C5 (Credit), Mathematics C4 (Credit), Data Processing A1
Sep 2015 – Jun 2021

Community & Professional Development

- Active attender of OWASP monthly London
- Annual volunteer at BSides London security conference
- Completed Advent of Cyber (TryHackMe) CTF and multiple HackTheBox challenges
- Home lab experience: Built and tested web server and Active Directory environments
- Familiarity with OWASP API Top 10 and LLM Top 10 Awareness
